

Automate RFQ Negotiation For Buy-Side and Sell-Side Desks

Trading OTC derivatives is often a slow process for both buy and sell-side desks. Most firms don't have an automated RFQ negotiation process and still use legacy chat, email, and phone to trade OTC derivatives. Symphony addresses these challenges with SPARC, a solution that provides structure, efficiency, openness, and compliance. SPARC leverages existing secure Symphony chat rooms for buy-side traders to easily create RFQs and for sell-side to acknowledge, negotiate and accept the RFQ terms.
