

Symphony Pro Tip: Keeping Chats Organized

Keep your left nav clean and organized by using folders. Drag and drop chats onto one another and name your folder.

Don't remember which folder your chat is in? Use the Quick Filter in the left nav to sort through all 1:1 and group chats – even search within folders.

How can you use Symphony Apps?

When markets move, you need to get relevant, up-to-date information as quickly as possible. Hover over a #hashtag or \$cashtag to launch applications from the Symphony Market. Dive deep into breaking news and data around keywords, industries or companies in real time. Read full articles and access current data without losing context or valuable time.

Symphony has just **launched 5 new integrations** – GitHub, JIRA, Salesforce, Zapier & our Universal Webhook. If you don't see them in your Symphony Market, be sure to request them from your Admin.

Symphony in the News:

Dozens of firms are joining the Symphony community to chat inside and outside their organizations: "This wave of adoption has enabled an entirely new workflow to emerge among the 200,000 licensed users on Symphony: one that is more efficient, integrated and automated." See who you can connect with in our [press release](#).

Coming next month: Leveraging the Symphony UI to streamline your workflow
