

**Symphony Pro Tip: Create an Alias for those you Chat with Most**  
 Quickly identify chats with colleagues, clients or partners by setting aliases for important users.

Go to a user's profile to give them a nickname, and set a color for their profile, background and alerts. This way, they will immediately stand out in busy chat rooms.

How can you Customize Symphony?

Customize your alerts for different rooms, IMs, and signals by sound, color (for windows app) and type. Have a message from a top client? Set up red desktop notifications with chimes for all your clients. Receive market-moving news from your Symphony Market apps? Set those notifications as flashing blue rows. Leverage Symphony's customizable alerts so you never miss an important message again.

### Symphony in the News:

Symphony just raised \$63M in new funding! Our founder and CEO David Gurlé said: "Our customers' desire to make Symphony their central platform and replace legacy tools is an endorsement of the efficiencies brought by an integrated collaboration platform and streamlined workflow." Read more in our [press release](#).

### Symphony Highlight Corner:

Symphony has 2 new apps: **Harvest Exchange** & **Infront**. Plus, we have 3 new apps arriving soon: Dow Jones Premium, ipushpull, and Koyfin - be sure to ask your Admin for access to all 5. Take a look at why ipushpull has decided to partner with Symphony in their [recent blog](#).

Coming next month: Using Symphony to surface relevant information when you need it
