

Enable Clients to Approve Trades Faster with the SGBot

Prices change instantly, which make it difficult for clients to be sure they have accurate information while making decisions on trades. As demonstrated at Innovate 2018, Société Générale has evolved its **SGBot** to deliver high-quality, accurate pricing in real time. With a development like the SGBot on Symphony, clients can:

1. Request pricing from the bot
2. Receive actionable pricing and automatic checks by the bot
3. Give instant approval on Symphony and complete the trade on SocGen's internal client execution systems

This workflow is fast and cost-effective, improving the client's experience. "Workflows like this take tasks from 30 minutes to zero because [SGBot] does it automatically." - Sylvain Salvetti, Head of Trading Process Factory, Société Générale.

Pro Tip: Find Attachments, Contacts, or Messages Instantly

Easily find important information with [Symphony search](#). Type keywords in the Search toolbar at the top of your screen and filter by specific messages, files, or chat rooms by keyword. No matter how many conversations and chat rooms you have, all information remains discoverable through search.

Read our [blog](#) for some other quick tips to enhance your Symphony experience.

[Webinar] Simplify Research and Trading with Symphony

Join Chris Rodriguez, Global Head of Workflow Specialists and Leah Cohen-Shohet, EVP, Network Growth & Adoption on Thursday, 2/21 at 11 am ET as they share examples from Innovate 2018 to demonstrate how clients like HSBC and BlackRock are utilizing Symphony to cut research and trading processes from minutes down to seconds.
